

Better Packages, Inc. Testimonial

Premier Distributor of Industrial Flooring

Faced with shipping heavy, bulky cartons, BetterSeal Secure water-activated tape solved their need for a strong, secure carton seal

“While shopping in a high-end, well-known housewares store I noticed an electronic tape dispenser being used to dispense paper tape. I thought the dispenser would work very well for our company because a strong carton seal is essential for us since we ship and distribute heavy cartons containing industrial flooring. I wrote the units info down on a piece of paper, even including the serial number; then immediately contacted Better Packages for info on how to purchase one or two of these machines.

The process was much smoother than I expected. I was forwarded the contact information for my local distributor and from there I called, received a demo appointment and then purchased one. We love it and couldn't be happier with the product.”
