

Better Packages, Inc. Testimonial

Navarro Spring Company Custom Spring Manufacturer

Since 1969, custom spring manufacturer relies on the Better Pack® 100 workhorse, along with water-activated tape for a strong, secure carton seal

With rugged, steel construction, the Better Pack 150 is the heaviest duty manual tape dispenser available.

“We’ve had our Better Pack 100 machine since 1969, which is when our company was started by my grandfather. It is an integral part of our organization used daily along with water-activated tape because it is tamper-evident, strong, and our boxes look neat and clean when they arrive to the customer. Our company is family owned and three generations have used the machine. It is a workhorse and we love it! We actually recently purchased a Better Pack 150 to keep up with our productivity demands and it is fast and easy to use as well.”
