“I still believe in your products and have been using them every day for the past few years. Everyone here at Snappy Auctions prefers water-activated tape and your tape dispenser over anything else we used to use. We even feature a picture of a carton sealed with water-activated tape in our listings on eBay, so we both get exposure! When someone wins the product we have listed on eBay, we take great care in providing the highest quality handling, shipping and packaging, which is why we use tamper-evident, reinforced water-activated tape. We know that plastic tape does not bond to the carton and can easily be removed undetected. I’ve got to tell you had I not seen the *Made in America* segment, I would still be wrangling with plastic tape. The show was an epiphany for me!”

“I am all for American made products, particularly when they are made so well!”
