

## Better Packages, Inc. Success Story

# US Navy—USS Nimitz Fulfillment of Military Aviation Parts

The USS Nimitz depends on the Better Pack 555eS and BetterSeal Secure Tape to provide safe, secure packaging for the aviation parts they distribute all over the world.

The USS Nimitz (CVN-68), a nuclear powered aircraft carrier in the United States Navy, is named for five-star Fleet Admiral Chester W. Nimitz, who served during World War II as commander of the Pacific fleet. The USS Nimitz was launched in 1972 and is one of the largest warships in the world. USS Nimitz deployments have included the Mediterranean Sea, Indian Ocean, Caribbean Sea, North Arabian Sea, Persian Gulf and the Western Pacific and has called Norfolk, Virginia and Bremerton, Washington home before moving to its current port of San Diego, California.

**Better Pack® eS with Tape Aerial Accessory** To get an idea of the sheer size of the USS Nimitz, its flight deck covers a total of 4.5 acres and holds about 85 airplanes, and the ship is about 18 stories from keel to the top of its mast. More than a million pounds of mail go through its Post Office each year.

The USS Nimitz's highly trained inspection, packaging and shipping department uses Better Packages products each day to package and ship high value and high volume aviation parts to repair centers around the world. The shipping department relies on the Better Pack 555eS and BetterSeal Secure Tape, along with the Tape Aerial accessory to package and ship aviation parts used to support F-18s, the aircraft that deliver firepower and precision guided bombs against enemy threats on the ground. They know that Better Packages products deliver the strength and security necessary when shipping critical military parcels.
